Chapter 1. Purpose and Need for Action.....	1
Document Structure	1
Changes between the Draft and Final EIS	2
Background	2
Fire Suppression Activities, Completed Fire Rehabilitation and Ongoing Fire Recovery Projects	3
Malheur Forest Plan Direction.....	5
Purpose and Need for Action	6
The Need to Reduce Potential High Fuel Levels.....	7
The Need to Improve the Appropriate Forest Vegetation Structural Characteristics .	8
The Need to Implement Reforestation Activities in the Project Area	10
The Need to Replace and Update Dedicated Old Growth and Associated Designated Habitats Impacted by the Monument Fire	10
The Need to Reduce Road and Old Skid Trail-Related Impacts to Watershed and Wildlife Values	10
The Need to Capture the Economic Value of Wood Products	10
Proposed Action.....	11
Background.....	12
Dead and Dying Tree Determination.....	13
Proposed Activities/Treatments	13
Actions Outside of this Final EIS to Address Recovery Needs	20
Decision Framework	20
Public Involvement	20
Initial Scoping	20
DEIS Comments/Responses	21
Coordination with Other Governments and Agencies	21
Issues.....	22
Other Analysis Issues.....	23
Laws and Regulations	26
Project Record.....	30
Chapter 2. Alternatives, Including the proposed action	31
Introduction.....	31
Changes made between the Draft and Final EIS	31
Alternative Development Process	32
Alternatives Considered but Eliminated from Detailed Study.....	33
Alternatives Considered in Detail	34
Common to All Alternatives	34
Alternative 1 (No Action)	35
Alternative 2.....	36
Alternative 3.....	39
Alternative 4.....	41
Alternative 5.....	44
Implementation Schedule for the Alternatives	46
Design Measures/Mitigation for Alternatives 2, 3, 4 and 5	46
Monitoring Plans.....	54

Chapter 3. Affected Environment and Environmental Consequences	61
Changes made between the Draft and Final EIS	61
Past, Present, and Foreseeable Actions	62
Forest Vegetation	63
Introduction.....	63
Regulatory Framework	63
Analysis Method	64
Affected Environment.....	65
Environmental Effects	74
Consistency with Direction and Regulations.....	82
Irreversible/Irrecoverable Effects.....	83
Fuels/Fire	83
Introduction.....	83
Regulatory Framework	84
Analysis Method	85
Affected Environment.....	86
Environmental Effects	90
Consistency with Direction and Regulations.....	97
Sensitive Plants	98
Regulatory Framework	98
Analysis Method	98
Affected Environment.....	99
Environmental Effects	100
Consistency with Direction and Regulations.....	105
Irreversible/ Irrecoverable Effects	105
Noxious Weeds	105
Regulatory Framework	105
Analysis Method	105
Affected Environment.....	105
Environmental Effects	106
Consistency with Direction and Regulations.....	108
Irreversible/ Irrecoverable Effects	108
Soil	108
Regulatory Framework	108
Analysis Method	109
Affected Environment.....	110
Environmental Effects	117
Consistency With Direction and Regulations	127
Irreversible/ Irrecoverable Effects	128
Aquatics - Fish/ Water Quality	128
Introduction.....	128
Regulatory Framework	128
Analysis Method	133
Affected Environment and Environmental Effects - Physical Habitat Elements ...	134
Affected Environment and Environmental Effects - Channel Stability Elements..	146
Affected Environment and Environmental Effects - Water Quality Elements.....	150
Cumulative Effects to Physical Elements, Channel Stability Elements, and Water Quality Elements.....	155

Affected Environment and Environmental Effects - Aquatic Species.....	158
Consistency With Direction and Regulations	181
Wildlife	184
Regulatory Framework	184
Analysis Method	185
Affected Environment & Environmental Effects - Management Indicator Species	188
Affected Environment and Environmental Effects - Other Species of Concern	234
Affected Environment and Environmental Effects – Old-Growth	240
Consistency with Direction and Guidelines.....	245
Irreversible/ Irrecoverable Effects	253
Recreation	253
Regulatory Framework	253
Analysis Method	253
Affected Environment.....	254
Environmental Effects	254
Consistency with Direction and Regulations.....	257
Visuals.....	258
Regulatory Framework	258
Analysis Method	258
Affected Environment.....	258
Environmental Effects	258
Consistency with Direction and Regulations	259
Irreversible/ Irrecoverable Effects	259
Cultural Resources	259
Regulatory Framework	259
Analysis Method	260
Affected Environment.....	261
Environmental Effects	262
Consistency with Direction and Regulations	264
Range	265
Regulatory Framework	265
Analysis Method	266
Affected Environment.....	266
Environmental Effects	267
Consistency With Direction and Regulations	270
Irreversible/ Irrecoverable Effects	270
Economics/Social.....	270
Regulatory Framework	271
Analysis Method	271
Affected Environment.....	271
Environmental Effects	275
Consistency with Direction and Regulations	282
Roads/Access	282
Regulatory Framework	282
Affected Environment.....	282
Environmental Effects	283
Consistency with Direction and Regulations	283
Irreversible/ Irrecoverable Effects	285

Other Disclosures	285
Issues Relating to the Beschta Report (1995)	286
Unroaded.....	293
Chapter 4. Consultation and Coordination.....	299
Preparers and Contributors.....	299
Contributors	300
Public Involvement Summary.....	301
Distribution of the Final Environmental Impact Statement	302
Glossary	307
References.....	315
References Cited	315
References Analyzed.....	326
Index.....	329

List of Tables

Table 1-1. Monument Fire Suppression Lines - Malheur NF portion	3
Table 1-2. Existing and Desired Fuel Loading within the Project Area.....	8
Table 1-3. Existing Monument Project Area Biophysical Types:	9
Table 1-4. Summary of Upland Salvage Treatment Activities – Proposed Action (Alternative 2).....	14
Table 1-5. Summary of RHCA Salvage Activities – Proposed Action	15
Table 1-6. Summary of Resiliency Treatment and Precommercial Thinning Activities - Proposed Action.....	17
Table 1-7. Summary of Road and Skid Trail Activities - Proposed Action	18
Table 1-8. Changes for DOG/ROG and Pileated Woodpecker Habitat- Proposed Action	19
Table 2-1. Alternative 3; Snags per Acre by Diameter Class.....	50
Table 2-2. Down Log – Alternatives 2, 3 and 4.....	51
Table 2-3. Description of Activities by Alternative.....	56
Table 2-4. Description of Activities by Alternative.....	57
Table 2-5. Comparison of Alternatives by Issue and Measurement.....	58
Table 2-6. Average Fuel Loading by Alternative	59
Table 2-7. Road Maintenance/Reconstruction Activities for Alternatives 2, 3, 4, and 5	59
Table 2-8. Harvest Summary by Alternative; Forested Wildlife Habitat.....	60
Table V-1. Monument Project Area Forest Types.....	69
Table V-2. Forest stand structures found in the Monument project area.....	70
Table V-3. Historic Range of Variability	71
Table V-4. Post-Fire Stand Structures - Swamp Creek Subwatershed.....	71
Table V-5. Post Fire Stand Structures - Upper Little Malheur Subwatershed.....	71
Table V-6. Projected Yearly Reforestation for Alternatives 2, 3, 4, and 5.....	78
Table V-7. Reforestation and Precommercial Thinning Prescriptions for Alternatives 2, 3, and 4.....	79
Table V-8. Reforestation Prescriptions for Alternative 5.....	80
Table F-1. Historic Large Fires.....	86

Table F-2. Fire Regimes	87
Table F-3. Fire Regimes/ Biophysical Environments/Severity Acres	89
Table F-4. Average Fuel Loading/No Action	92
Table F-5. Fuel Loading/Alternative 2	93
Table F-6 Fuel Loading/Alternative 3	95
Table F-7. Fuel Loading/Alternative 4	96
Table S-1.-Minimum Percent Effective Ground Cover Following Land Management Activities:.....	109
Table S-2: Vegetative Burn Severity by Subwatershed.....	113
Table S-3. Existing Detrimental Soil Conditions by Proposed Treatment Unit	114
Table S-4. Past Logging Entries in the Monument Project Area.....	115
Table S-5. Erosion Potential Tractor Harvest Units Alternative 2	120
Table S-6. Predicted Total Disturbed Soil Conditions Following Tractor Harvest Under Alternatives 2, 3, and 4. Note: Units 10 and 12 will not be logged under Alternative 3. Assumes use of feller-bunchers, and dry or moist ground conditions.....	122
Table S-7. Predicted Total Disturbed Soil Conditions Following Helicopter Harvest Under Alternatives 2, 3, and 4	123
Table A-1. RHCA Buffer Widths	131
Table A-2. Effect Determinations/ Changes Between DEIS and FEIS	134
Table A-3. Size Classes of Large Woody Debris.	135
Table A-4. Forest Plan Standards (Amendment 29) for Large Woody Debris (LWD). 135	135
Table A-5. Number of Pieces of LWD Per Reach.....	135
Table A-6. Number of Standing Dead Trees Per Mile Needed to Provide Replacement LWD In Ponderosa Pine Ecosystems to Meet Minimum Forest Plan Standards ..	136
Table A-7. Spacing of Pools by Reach	139
Table A-8. Estimated Number of Pools Likely to be Formed in the Little Malheur River and Camp Creek as Replacement LWD is Recruited into Stream Channels.....	139
Table A-9. Estimated Number of Pools That Will Be Formed From Small Woody Debris (< 20" diam) for the Little Malheur River and Camp Creek.	140
Table A-10. Potential Effects to Aquatic Organisms from Fine Sediment.....	141
Table A-11. Percentage of Fine Sediment by Reach.....	141
Table A-12. Levels of Fine Sediment (particles < 6mm) in the Little Malheur River..	142
Table A-13. Miles of Roads in RHCA by Surface Type in the Analysis Area.....	142
Table A-14. Roads Identified as Contributing to Elevated Levels of Fine Sediment in the Project Area	143
Table A-15. Sensitivity of Channel Type to Disturbance.....	146
Table A-16. Bank Stability for Streams in the Project Area.....	147
Table A-17. Pre and Post-Fire Estimated 25-Year Peak Flows for Subwatersheds Most Influenced by the Monument Fire. Flows are Expressed in Cubic Feet Per Second.	147
Table A-18. 303(d) Listed Streams in the Project Area.....	151
Table A-19. Comparison of Pre- and Post Fire 7-Day-Mean-Maximum Water Temperatures in Streams in the Project Area.	151
Table A-20. Acres Burned by RHCA Category in the Monument Fire Area.....	152
Table A-21. Changes in Acres of Hydrologic Openings Following the 2002 Monument Fire.	154
Table A-22. Pre and Post-Fire Estimated 25-Year Peak Flows for Subwatersheds Most Influenced by the Monument Fire.....	155

Table A-23. Aquatic Species with Special Management Status Present or Suspected in the Project Area.....	155
Table W-1. Post-fire snag densities by density group (Snags/Acre) for Ponderosa Pine/Douglas-fir and Blue Mountain Mixed Conifer wildlife habitat types.....	190
Table W-2. Existing tolerance level for cavity nesting species within the fire area.....	192
Table W-3. Wildlife habitat type = Ponderosa Pine/Douglas-fir; Structural condition = larger trees.....	194
Table W-4. Wildlife habitat type = Blue Mountain mixed conifer; structural condition = larger trees.....	195
Table W-5. Black-Backed Woodpecker – Wildlife tolerance levels	196
Table W-6. Hairy Woodpecker – Wildlife tolerance levels	196
Table W-7. Lewis' Woodpecker – Wildlife tolerance levels	196
Table W-8. Northern Flicker – Wildlife tolerance levels	196
Table W-9. White-Headed Woodpecker – Wildlife tolerance levels	197
Table W-10. Comparison of big game cover, winter and summer range. Winter range is not present in the Swamp Creek subwatershed.....	214
Table W-11. Road densities by subwatershed and Project Area based on range type, existing condition. Winter range is not present in the Swamp Creek subwatershed.....	219
Table W-12. Miles of road per square mile by subwatershed in summer and winter range, Alternatives 2, 3, and 4. Winter range is not present in the Swamp Creek subwatershed.....	220
Table W-13. Miles of road per square mile by subwatershed in summer and winter range, Alternative 5. Winter range is not present in the Swamp Creek subwatershed.....	221
Table W-14. HEI Final and Variables. Winter range is not present in the Swamp Creek subwatershed.....	223
Table W-15. Forest and structure/habitat types and associated focal landbird species .	238
Table W-16. List of species of BCR 10, Northern Rockies Region, Their status as present or absent from the Project Area, and reasons for absence.....	244
Table W-17. Changes for DOG/ROG and Pileated Woodpecker Habitat- Proposed Action.....	246
Table C-1. Activities Planned in Areas Classified as High-Probability for the Occurrence of Cultural Resources.....	263
Table ES-1. Malheur National Forest Timber Offer by Fiscal Year 1991 to 2002	276
Table ES-2. Present Net Benefit, Present Net Costs, and Present Net Value.....	279
Table 4-1: Individuals Who Commented on the Monument DEIS	302

Map Section

The following maps are located at the end of FEIS, Vol. 1 in the Map Section:

- Figure 1. Vicinity Map
- Figure 2. Project Area, Land Status, and Subwatershed Boundaries
- Figure 3. Fire Severity: Malheur NF Portion of the Monument Fire
- Figure 4. Malheur Forest Plan Management Areas within Project Area and Monument Rock Wilderness Boundary
- Figure 5. Alternative 2
- Figure 6. Alternative 3
- Figure 7. Alternative 4
- Figure 8. Planting for Alternatives 2, 3 and 4/ Precommercial Thinning for Alternative 2 and 4
- Figure 9. Planting Planned for Alternative 5
- Figure 10. Road Maintenance (Alternatives 2, 3, 4 and 5) and Other Road Activities Associated with Timber Harvest Activities (Alternatives 2, 3 and 4)
- Figure 11. Locations of Planned Temporary Roads and Helicopter Log Service Landings
- Figure 12. Planned Road Management for Alternatives 2, 3 and 4
- Figure 13. Planned Road Management for Alternative 5
- Figure 14. Old Skid Trail Obliterations Planned for Alternatives 2, 3, 4 and 5
- Figure 15. Dedicated Old Growth and Replacement Old Growth Changes Planned for Alternatives 2, 3, 4 and 5
- Figure 16. Forest Structure
- Figure 17. Fire Regimes
- Figure 18. Surface Erosion Hazard
- Figure 19. Location of INFISH Priority Watersheds in the Vicinity of the Monument Project
- Figure 20. Location of Surveyed Stream Reaches in the Analysis Area
- Figure 21. Comparison of Existing Levels of LWD in Surveyed Stream Reaches in the Analysis Area to the Forest Plan Standard
- Figure 22. Comparison of Existing Numbers of Pools in Surveyed Stream Reaches in the Analysis Area
- Figure 23. Comparison of Existing Levels of Fine Sediment in Surveyed Stream Reaches in the Analysis Area to the Forest Plan Standard
- Figure 24. Comparison of Bank Stability in Surveyed Stream Reaches in the Analysis Area to Forest Plan Standard
- Figure 25. Fire Severity in RHCAs in the Monument Fire Area
